

12 September

SUSTAINABLE AGRICULTURE GREEN PRACTICES

innovations in the metropolitan area of Milan

The event is organized by the **Lombardy Green Chemistry Cluster**, the regional point of reference for the development of the bioeconomy and circular economy and by the project **RUMORE - Interreg Europe**.

The event aims to promote **dialogue** and **cooperation** between the bio-based industries and the Agricultural Districts of the Metropolitan Area of Milan, with the aim of providing rural businesses new circular economy opportunities through the innovative use of biomass, bringing together the interests of academics, researchers, stakeholders and policymakers operating in the bio-based sector.

The opportunity to **create new value chains** aims to capture the attention of the Agricultural Districts involved in the RUMORE project, providing models for the **valorisation of waste and agro-food by-products**, which today represent a disposal cost for producers and allowing the diversification of production and the birth of new production chains.

During the event, the **final results of the PHA-STAR project**, financed by the Lombardy Region in the context of the Smart Fashion and Design call, concerning the sustainable production of bioplastics starting from unused agro-food by-products will be showed. This project is proposed as a possible model of innovation and application of the circular economy to the agricultural world.

REGISTRATIONS.

Registrations are open until 12 September 2019.

Register in a click at this link! <https://eventobuonepratichegreen.eventbrite.it>

CONTACT AND INFORMATION:

LOMBARDY GREEN CHEMISTRY ASSOCIATION www.chimicaverdelombardia.it | segreteria@chmicaverdelombardia.it | +39.02.5060191

Chairman: Andrea De Bortoli – Consorzio Italbiotec

9.00 Registration

9.30 Welcome addresses

Pietro Foroni – Minister for the Territory and Civil Protection of the Lombardy Region
Diego Bosco – President Lombardy Green Chemistry Association

9.45 Round Table – The sustainable production of bioplastics through the enhancement of waste and agro-food biomass

- **Melissa Balzarotti** – Project Manager Consorzio Italbiotec
 "Bioplastics in Lombardy: impacts and industrial potential of new supply chains"
- **Fabrizio Adani** – Full professor DISAA Università degli Studi di Milano
 "Organic waste: a resource for the production of bioplastics. The RAINBOW project"
- **Elisa Casaletta** – R&D manager Agromatrici
 "From the dairy by-product to the biopolymer: the results of the PHA-STAR project"
- **Antonella Andriani** – Designer
 "Sustainability meets Design: PHA-STAR prototypes"
- **Daniele Radaelli** – eKoala Co-Founder
 "From agriculture to bioplastics: a model of Lombardy's circular economy"

11.30 Round Table – Models for the development of rural innovation

- **Anna Rossi** – Lombardy Region
- Territorial Development Framework Agreement Milan Metropoli Rural – AQST
- RUMORE Project: new models for the development of rural innovation
- Good practices in agriculture: examples of Agricultural Districts in the Metropolitan Area of Milan
 DAM – Distretto agricolo milanese
 DINAMO – Distretto neorurale delle tre acque di Milano
 DAVO – Distretto agricolo della Valle Olona
 DAMA – Distretto agricolo Adda Martesana
 RISO e RANE – Distretto rurale Riso e Rane

13.00 Light Lunch
